

AMENDMENTS

Amendments to the Specification:

In response to the Official Action and in accordance with 37 CFR 1.121(c), please enter the following rewritten paragraphs from the specification of the instant application.

Please amend paragraph [0038] as is indicated below:

[0038] Figure 4 illustrates in a general way ~~the~~ a preferred screen appearance after the alignment process has taken place. As can be seen, in the preferred arrangement the transitions **410**, **420**, and **430** have been adjusted in duration to align them with the markers M1-M7 in the audio track **103**. For example, the time duration of Transition T1 **410** (e.g., a cross fade between Clips A and B) has been lengthened into the ending of Clip A to align the start of the cross fade transition T1 with Marker M2. Similarly, the time duration **420** of Transition T2 has been adjusted by expanding it into both Clips B and C (transition **420**). Finally, the time duration **430** of transition T3 has been expanded in the direction of Clip D, with the start of its transition being approximately equal to marker M5.
